

Redistricting Process

February 2022

What is Redistricting?

- ▶ Required by law every 10 years to adjust the District's electoral divisions
- ▶ Based on Federal Census Data
- ▶ Division Boundaries are to be based on the following considerations:
 - Substantially Equal Populations in each Division
 - Topography
 - Geography
 - Cohesiveness
 - Contiguity
 - Integrity
 - Compactness
 - Communities of Interest
 - Compliance with Federal Voting Rights Act, including majority-minority division
- ▶ Two public hearings required for public comment and final adoption

Analysis and Proposal

- ▶ Current electoral divisions were established in 2016 as a result of a settlement
- ▶ Converted from at-large to by-subdistrict election system
- ▶ Census data shows population has remained balanced within current divisions
 - Total Population = 34,738
 - Division Population Goal = 6,948
 - Acceptable Deviation by Law = 10%

Analysis and Proposal

- ▶ Largest deviation is between 1 and 3, at 9.64%, which is within the acceptable spread
- ▶ Current division boundaries can be maintained
- ▶ Division 3 meets criteria for majority minority division

Division	Population
1	7,195
2	6,946
3	6,525
4	7,055
5	7,017
